

## **Interfaces in Crystalline Materials**

### **Comments from readers**

Morris Cohen, former Institute Professor at MIT, sent the following comment about the book to my co-author Professor Robert Balluffi:

*I want to extend my sincerest congratulations and admiration to you and Sutton for a fantastic piece of work. I am amazed, overwhelmed, and even breathless at what you have accomplished in this authoritative, comprehensive and beautifully expressed treatise. It will be a classic for all time. Now enjoy it!*

John Spence ForMemRS, former Richard Snell Professor of Physics at Arizona State University, sent the following comment to me in a hand-written letter:

*Congratulations on your Interfaces book! We have just adopted it as a text for The Materials Program. It really is a mighty achievement you should feel v. proud of.*
